ABSTRACTS
947 30th Annual Congress and Summer School of the South African Association for Physicists in Medicine and Biology

ACCELERATORS
819 Energy deposition at the bone-tissue interface from nuclear fragments produced by high-energy nucleons

837 Estimation of neutron dose equivalent at the mezzanine of the advanced light source and the laboratory boundary using the ORNL program MORSE

ACCIDENT ANALYSIS
151 Cleanup of large areas contaminated as a result of a nuclear accident

152 Response to a radioactive materials release having a transboundary impact

ACCIDENTS, NUCLEAR
146 Cesium-137 urinary excretion by northeastern Italian (Pordenone) people following the Chernobyl nuclear accident: a comment

362 Guidelines for iodine prophylaxis following nuclear accidents

946 Extension of the principles of radiation protection to sources of potential exposure

ACCIDENTS, REACTOR
152 Response to a radioactive materials release having a transboundary impact

AIR SAMPLING
533 Ground-based air-sampling measurements near the Nevada Test Site after atmospheric nuclear tests

ANALYSIS, RISK
77 Factors that modify risks of radiation-induced cancer

99 Risk estimates: past, present, and future

141 Risk assessment methodologies for target fragments produced in high-energy nucleon reactions

287 Diagnostic thyroid procedures and corresponding radiation doses in Manitoba: 1981-1985

339 Further observations on environmental radiation and cancer in India

ANALYSIS, RISK (CONT.)
915 Chemical risks from nuclear waste repositories: review of the literature

925 Optimizing radiation worker protection: the practical application of risk analysis

ANNUAL LIMIT ON INTAKE
229 Bioassay and laboratory survey scheduling based on radioisotope inventory

AQUATIC ORGANISMS
869 Short-term bioconcentration studies of Np in freshwater biota

ATOMIC BOMB
179 Atmospheric nuclear weapon test history as characterized by the deposition of ^{14}C in human teeth

ATOMIC BOMB SURVIVORS
57 Effects of prenatal exposure to ionizing radiation

69 Hiroshima and Nagasaki: new doses, risks, and their implications

99 Risk estimates: past, present, and future

339 Further observations on environmental radiation and cancer in India

765 Bomb survivor selection and consequences for estimates of population cancer risks

ATTENUATION
117 Improved ultrasonic measurement techniques applied to assay of Pu and other transuranics in lung

BEIR IV REPORT
89 Radon and lung cancer: the BEIR IV report

BEIR V REPORT
233 Reasoning of BEIR V

233 Inconsistencies in recent BEIR report

BIOASSAY
229 Bioassay and laboratory survey scheduling based on radioisotope inventory

BIODEGRADATION
461 Biodegradable liquid scintillation counting cocktails

BIOKINETICS
183 Biokinetics of ^{237}Pu citrate and nitrate in the rat: implications for Pu studies in man

BONES, HUMAN
819 Energy deposition at the bone-tissue interface from nuclear fragments produced by high-energy nucleons

BOOK REVIEWS
235 IAEA safety series no. 100, evaluating the reliability of predictions made using environmental transfer models

236 Thermoluminescence in solids and its applications

236 More of Mould's medical anecdotes

361 Limit for exposure to hot particles on the skin

362 Guidelines for iodine prophylaxis following nuclear accidents

362 Evaluating the reliability of predictions made using environmental transfer models

485 Intercomparison of environmental gamma dose rate meters: a comprehensive study of calibration methods and field measurements

943 Deadly deceit: low level radiation, high level cover up

944 The legacy of Chernobyl

944 Operational radiation protection: a guide to optimization

945 Nuclear power development: prospects in the 1990s

945 Provision of operational radiation protection services at nuclear power plants

946 Extension of the principles of radiation protection to sources of potential exposure

BRACHYTHERAPY
151 Treatment planning and dose calculation in radiation oncology

CALCIUM
433 Metabolism of Ca and Sr in late adult life

CALIBRATION
311 Simulation of angular and energy distributions of the PTB beta secondary standard

358 Comments to Olson article

CALIBRATION (CONT.)

485 Intercomparison of environmental gamma dose rate meters: a comprehensive study of calibration methods and field measurements

CANCER

49 Low-dose radiation effects: interactions and synergism

63 Occupational radiation studies: status, problems, and prospects

69 Hiroshima and Nagasaki: new doses, risks, and their implications

77 Factors that modify risks of radiation-induced cancer

89 Radon and lung cancer: the BEIR IV report

151 Treatment planning and dose calculation in radiation oncology

233 Inconsistencies in recent BEIR report

233 Reasoning of BEIR V

305 Induction of lymphoma and osteosarcoma in mice by single and protracted low α doses

339 Further observations on environmental radiation and cancer in India

353 Response to 'Expected indoor ^{222}Rn levels in counties with very high and very low lung cancer rates'

354 Reply to Oge

739 Cohort study of thyroid disease near the Nevada Test Site: a preliminary report

765 Bomb survivor selection and consequences for estimates of population cancer risks

791 Predicted and observed early effects of combined α and β lung irradiation

807 Design issues in epidemiologic studies of indoor exposure to Rn and risk of lung cancer

819 Energy deposition at the bone-tissue interface from nuclear fragments produced by high-energy nucleons

CARBON-14

179 Atmospheric nuclear weapon test history as characterized by the deposition of ^{14}C in human teeth

CARCINOGENESIS
15 Production and repair of DNA damage in mammalian cells

49 Low-dose radiation effects: interactions and synergism

145 A mathematical analysis of risk models advocated by Gofman

146 Gofman response to Stovall on dose-response equations

CESIUM
189 Fungi: a major source of radiocesium contamination of grazing ruminants in Norway

CESIUM-137
146 Cesium-137 urinary excretion by northeastern Italian (Pordenone) people following the Chernobyl nuclear accident: a comment

443 Modeling transfer of ^{137}Cs fallout in a large Finnish watercourse

455 Measurements of radiocesium transfer to milk and calculation of resulting dose in Brescia, Italy, following the Chernobyl accident

541 Radioactive fallout reconstruction from contemporary measurements of reservoir sediments

565 Estimates of fallout in the continental U.S. from Nevada weapons testing based on gummed-film monitoring data

879 Desorption kinetics and mobility of some radionuclides in sediments

CHARCOAL FILTERS
139 An apparatus for serial ^{222}Rn adsorption measurements within a controlled environment

217 Screening survey of indoor ^{222}Rn in South Carolina

393 Adsorption and desorption of noble gases on activated charcoal: II. ^{222}Rn studies in a monolayer and packed bed

CHERNOBYL
146 Cesium-137 urinary excretion by northeastern Italian (Pordenone) people following the Chernobyl nuclear accident: a comment

151 Cleanup of large areas contaminated as a result of a nuclear accident

152 Response to a radioactive materials release having a transboundary impact

CHERNOBYL (CONT.)
455 Measurements of radiocesium transfer to milk and calculation of resulting dose in Brescia, Italy, following the Chernobyl accident

944 The legacy of Chernobyl

COBALT-60
484 Query to 'Activation of Co...' by Ocken

484 Buildup of ^{60}Co from ^{59}Co: a reply to Sun

879 Desorption kinetics and mobility of some radionuclides in sediments

COMPUTED TOMOGRAPHY
151 Treatment planning and dose calculation in radiation oncology

COMPUTERS
149 CASKCODES-CAPSIZE, SCOPE, and KWIKDOSE for shipping cask optimization dose calculation, parameter evaluation, and shielding requirements

229 Bioassay and laboratory survey scheduling based on radioisotope inventory

359 First-order compartmental models and the matrix of mean residence times

360 Reply to Coleman

941 HPEXAM version 2.0

942 Genmod-PC version 2.1

CONTAMINATION, ENVIRONMENTAL
151 Cleanup of large areas contaminated as a result of a nuclear accident

179 Atmospheric nuclear weapon test history as characterized by the deposition of ^{14}C in human teeth

501 Evaluation of environmental radiation exposures from nuclear testing in Nevada: a symposium

515 Additional calculations of radionuclide production following nuclear explosions and Pu isotopic ratios for Nevada Test Site events

715 External exposure estimates for individuals near the Nevada Test Site

CONTAMINATION, ENVIRONMENTAL (CONT.)
849 Effectiveness of three natural biobarriers in reducing root intrusion by four semi-arid plant species

CONTAMINATION, INTERNAL
109 Fifteen years of radiological protection experience in a regional radiopharmacy

189 Fungi: a major source of radiocesium contamination of grazing ruminants in Norway

CORRECTIONS
365 Correction for: Determining the charged fractions of ^{218}Po and ^{214}Pb using an environmental gamma-ray and Rn detector. Health Phys. 57:51-59; 1989

COUNTING EFFICIENCY
461 Biodegradable liquid scintillation counting cocktails

DEPOSITION
577 Analysis of meteorological and radiological data for selected fallout episodes

593 Meteorological modeling of arrival and deposition of fallout at intermediate distances downwind of the Nevada Test Site

603 Meteorological modeling of radioiodine transport and deposition within the continental United States

DETECTOR, NUCLEAR TRACK
349 Equilibrium factor and dosimetry of Rn by a nuclear track detector

DETECTOR, PHOSWICH
117 Improved ultrasonic measurement techniques applied to assay of Pu and other transuranics in lung

DETECTOR, RADIATION
139 An apparatus for serial ^{222}Rn adsorption measurements within a controlled environment

325 Investigation of neutron scattering for a multisphere spectrometer

421 Design of a positionally sensitive laser-heated thermoluminescent detector system

DETECTOR, THERMOLUMINESCENT
827 Evaluation of two thermoluminescent detection systems for medical imaging environments

DIAGNOSTIC RADIOLOGY
295 Radiotherapy verification film for estimating cumulative entrance skin exposure for fluoroscopic examinations

345 Population irradiation factors (PIFs) in diagnostic medical dosimetry

357 Annual frequency of diagnostic x-ray examinations in the Netherlands

827 Evaluation of two thermoluminescent detection systems for medical imaging environments

DIFFUSION
879 Desorption kinetics and mobility of some radionuclides in sediments

DNA
15 Production and repair of DNA damage in mammalian cells

DOSE
936 EURADOS-CENDOS discusses ICRP draft recommendations

DOSE, ABSORBED
819 Energy deposition at the bone-tissue interface from nuclear fragments produced by high-energy nucleons

DOSE, INTERNAL
267 Optimization of filtration for reduction of lung dose from Rn decay products: part I-theoretical

277 Optimization of filtration for the reduction of lung dose from Rn decay products: part II-experimental

359 First-order compartmental models and the matrix of mean residence times

360 Reply to Coleman

619 An analysis of vegetation interception data pertaining to close-in weapons test fallout

627 Pasture practices, milk distribution, and consumption in the continental U.S. in the 1950s

637 Milk distribution and feeding practice data for the PATHWAY model

645 Estimation of radionuclide ingestion: the PATHWAY food-chain model

659 Models of radioiodine transport to populations within the continental U.S.

DOSE, INTERNAL (CONT.)
669 Development of a method to estimate thyroid dose from fallout radioiodine in a cohort study

693 ORERP internal dose estimates for individuals

942 Genmod-PC version 2.1

DOSE, LOW
11 Biological effects of low-dose radiation: overview and perspective

15 Production and repair of DNA damage in mammalian cells

29 T cell potentiation by low-dose ionizing radiation: possible mechanisms

35 Cell-oriented alternatives to dose, quality factor, and dose equivalent for low-level radiation

49 Low-dose radiation effects: interactions and synergism

63 Occupational radiation studies: status, problems, and prospects

77 Factors that modify risks of radiation-induced cancer

305 Induction of lymphoma and osteosarcoma in mice by single and protracted low α doses

DOSE, SKIN
295 Radiotherapy verification film for estimating cumulative entrance skin exposure for fluoroscopic examinations

DOSE EQUIVALENT
299 Dose equivalent response of a TLD badge-influence of body backscatter

349 Equilibrium factor and dosimetry of Rn by a nuclear track detector

837 Estimation of neutron dose equivalent at the mezzanine of the advanced light source and the laboratory boundary using the ORNL program MORSE

DOSE EQUIVALENT, EFFECTIVE
345 Population irradiation factors (PIFs) in diagnostic medical dosimetry

936 EURADOS-CENDOS discusses ICRP draft recommendations

939 Annual per caput effective dose equivalent of Beijing inhabitants from diagnostic x-ray procedures

DOSIMETRY
199 Health physics concerns in commercial aviation

361 The physics and radiobiology of fast neutron beams

777 Lung dosimetry of thorotrast patients

827 Evaluation of two thermoluminescent detection systems for medical imaging environments

DOSIMETRY, INTERNAL
305 Induction of lymphoma and osteosarcoma in mice by single and protracted low α doses

DOSIMETRY, PERSONNEL
23 New approaches for biological monitoring of radiation workers

299 Dose equivalent response of a TLD badge-influence of body backscatter

DOSIMETRY, THERMOLUMINESCENT
236 Thermoluminescence in solids and its applications

421 Design of a positionally sensitive laser-heated thermoluminescent detector system

EDITORIALS
253 Promises kept: 1990 editorial report

763 Radiation phobia as a culturally mediated reflex

EDUCATION
9 The danger of the empty pipeline: a major problem in our profession

941 HPEXAM version 2.0

ELECTRONS
837 Estimation of neutron dose equivalent at the mezzanine of the advanced light source and the laboratory boundary using the ORNL program MORSE

EMERGENCY PLANNING
152 Response to a radioactive materials release having a transboundary impact

EPIDEMIOLOGY
169 Feasibility of an epidemilogic study of thyroid neoplasia in persons exposed to radionuclides from the Hanford Nuclear Facility between 1944 and 1956

807 Design issues in epidemiologic studies of indoor exposure to Rn and risk of lung cancer

ERRATA

365 Correction for: Determining the charged fractions of ^{218}Po and ^{214}Pb using an environmental gamma-ray and Rn detector. Health Phys. 57:51-59; 1989

ETHICS

356 Ethics and communication

EXPOSURE, EXTERNAL

525 Historical estimates of external gamma exposure and collective external gamma exposure from testing at the Nevada Test Site. II. Test series after Hardtack II, 1958, and summary

669 Development of a method to estimate thyroid dose from fallout radioiodine in a cohort study

715 External exposure estimates for individuals near the Nevada Test Site

723 Individual external exposures from Nevada Test Site fallout for Utah leukemia cases and controls

EXPOSURE, INTERNAL

233 Inconsistencies in recent BEIR report

233 Reasoning of BEIR V

EXPOSURE, OCCUPATIONAL

23 New approaches for biological monitoring of radiation workers

63 Occupational radiation studies: status, problems, and prospects

103 Prenatal radiation exposure policy: a labor arbitration

109 Fifteen years of radiological protection experience in a regional radiopharmacy

133 Occurrence of ^{222}Rn and progeny in natural gas processing plants in Western Canada

193 Ultraviolet radiation and blue light from photofloods in television studios and theaters

199 Health physics concerns in commercial aviation

483 Failing to prove danger is no proof of safety

483 Failing to prove danger is no proof of safety: a reply

925 Optimizing radiation worker protection: the practical application of risk analysis

EXPOSURE, OCCUPATIONAL (CONT.)
931 Source inventory limits

935 Sex discrimination in prenatal radiation exposure policies of U.S. NRC licensees: U.S. NRC staff position

946 Extension of the principles of radiation protection to sources of potential exposure

EXPOSURE, PRENATAL
57 Effects of prenatal exposure to ionizing radiation

935 Sex discrimination in prenatal radiation exposure policies of U.S. NRC licensees: U.S. NRC staff position

EXPOSURE, RADIATION
29 T cell potentiation by low-dose ionizing radiation: possible mechanisms

35 Cell-oriented alternatives to dose, quality factor, and dose equivalent for low-level radiation

49 Low-dose radiation effects: interactions and synergism

205 Predicting annual average indoor ^{222}Rn concentration

295 Radiotherapy verification film for estimating cumulative entrance skin exposure for fluoroscopic examinations

361 Limit for exposure to hot particles on the skin

503 Overview of the Department of Energy's Off-Site Radiation Exposure Review Project (ORERP)

541 Radioactive fallout reconstruction from contemporary measurements of reservoir sediments

555 Estimates of exposure rates and fallout arrival times near the Nevada Test Site

EXTERNAL EXPOSURE ESTIMATES
715 External exposure estimates for individuals near the Nevada Test Site

723 Individual external exposures from Nevada Test Site fallout for Utah leukemia cases and controls

EXTRAPOLATION
99 Risk estimates: past, present, and future

183 Biokinetics of ^{237}Pu citrate and nitrate in the rat: implications for Pu studies in man

EXTRAPOLATION (CONT.)
869 Short-term bioconcentration studies of Np in freshwater biota

FALLOUT
443 Modeling transfer of ^{137}Cs fallout in a large Finnish watercourse

455 Measurements of radiocesium transfer to milk and calculation of resulting dose in Brescia, Italy, following the Chernobyl accident

99 Risk estimates: past, present, and future

141 Risk assessment methodologies for target fragments produced in high-energy nucleon reactions

287 Diagnostic thyroid procedures and corresponding radiation doses in Manitoba: 1981-1985

339 Further observations on environmental radiation and cancer in India

915 Chemical risks from nuclear waste repositories: review of the literature

925 Optimizing radiation worker protection: the practical application of risk analysis

SAFETY STANDARDS

199 Health physics concerns in commercial aviation

225 Safe use of infrared viewing cards

236 Safety principles and technical criteria for the underground disposal of high level radioactive wastes

SAFETY STANDARDS (CONT.)
891 Transmission of a Gaussian scanning beam through circular, square, and slit apertures. Part I. Theory

944 Operational radiation protection: a guide to optimization

946 Extension of the principles of radiation protection to sources of potential exposure

SCALING
99 Risk estimates: past, present, and future

183 Biokinetics of ^{237}Pu citrate and nitrate in the rat: implications for Pu studies in man

SCANNING
891 Transmission of a Gaussian scanning beam through circular, square, and slit apertures. Part I. Theory

SCREENING MEASUREMENTS
217 Screening survey of indoor ^{222}Rn in South Carolina

SEDIMENTS
541 Radioactive fallout reconstruction from contemporary measurements of reservoir sediments

879 Desorption kinetics and mobility of some radionuclides in sediments

SHIELDING
361 The physics and radiobiology of fast neutron beams

SKELETON
305 Induction of lymphoma and osteosarcoma in mice by single and protracted low α doses

SOFTWARE REVIEWS
149 CASKCODES-CAPSIZE, SCOPE, and KWIKDOSE for shipping cask optimization dose calculation, parameter evaluation, and shielding requirements

941 HPEXAM version 2.0

942 Genmod-PC version 2.1

SOIL
405 Developing soil gas and ^{222}Rn entry potentials for substructure surfaces and assessing ^{222}Rn control diagnostic techniques

471 Default soil solid/liquid partition coefficients, K_ds, for four major soil types: a compendium

SOIL (CONT.)
515 Additional calculations of radionuclide production following nuclear explosions and Pu isotopic ratios for Nevada Test Site events

849 Effectiveness of three natural biobarriers in reducing root intrusion by four semi-arid plant species

SPECTROMETRY, GAMMA
125 Analysis of ^{228}Ra and ^{226}Ra in public water supplies by a gamma-ray spectrometer

358 Comments to Olson article

SPECTROMETRY, NEUTRON
325 Investigation of neutron scattering for a multisphere spectrometer

STRONTIUM
433 Metabolism of Ca and Sr in late adult life

STRONTIUM-85
879 Desorption kinetics and mobility of some radionuclides in sediments

SURVEYS
217 Screening survey of indoor ^{222}Rn in South Carolina

229 Bioassay and laboratory survey scheduling based on radioisotope inventory

SURVIVORS, ATOMIC BOMB
57 Effects of prenatal exposure to ionizing radiation

69 Hiroshima and Nagasaki: new doses, risks, and their implications

99 Risk estimates: past, present, and future

339 Further observations on environmental radiation and cancer in India

765 Bomb survivor selection and consequences for estimates of population cancer risks

SYNCHROTRON
837 Estimation of neutron dose equivalent at the mezzanine of the advanced light source and the laboratory boundary using the ORNL program MORSE

THERMOLUMINESCENCE
236 Thermoluminescence in solids and its applications

THERMOLUMINESCENCE (CONT.)
299 Dose equivalent response of a TLD badge-influence of body backscatter

311 Simulation of angular and energy distributions of the PTB beta secondary standard

421 Design of a positionally sensitive laser-heated thermoluminescent detector system

827 Evaluation of two thermoluminescent detection systems for medical imaging environments

THOROTRAST
777 Lung dosimetry of thorotrast patients

THYROID
169 Feasibility of an epidemilogic study of thyroid neoplasia in persons exposed to radionuclides from the Hanford Nuclear Facility between 1944 and 1956

287 Diagnostic thyroid procedures and corresponding radiation doses in Manitoba: 1981-1985

362 Guidelines for iodine prophylaxis following nuclear accidents

511 Overview of the National Cancer Institute's activities related to exposure of the public to fallout from the Nevada Test Site

525 Historical estimates of external gamma exposure and collective external gamma exposure from testing at the Nevada Test Site. II. Test series after Hardtack II, 1958, and summary

669 Development of a method to estimate thyroid dose from fallout radioiodine in a cohort study

739 Cohort study of thyroid disease near the Nevada Test Site: a preliminary report

TOXICITY
791 Predicted and observed early effects of combined α and β lung irradiation

915 Chemical risks from nuclear waste repositories: review of the literature

TRANSFER COEFFICIENTS
443 Modeling transfer of ^{137}Cs fallout in a large Finnish watercourse

TRANSFER COEFFICIENTS (CONT.)
455 Measurements of radiocesium transfer to milk and calculation of resulting dose in Brescia, Italy, following the Chernobyl accident

TRANSPORT, ENVIRONMENTAL
189 Fungi: a major source of radiocesium contamination of grazing ruminants in Norway

235 IAEA safety series no. 100, evaluating the reliability of predictions made using environmental transfer models

362 Evaluating the reliability of predictions made using environmental transfer models

455 Measurements of radiocesium transfer to milk and calculation of resulting dose in Brescia, Italy, following the Chernobyl accident

619 An analysis of vegetation interception data pertaining to close-in weapons test fallout

627 Pasture practices, milk distribution, and consumption in the continental U.S. in the 1950s

637 Milk distribution and feeding practice data for the PATHWAY model

645 Estimation of radionuclide ingestion: the PATHWAY food-chain model

659 Models of radioiodine transport to populations within the continental U.S.

853 Atmospheric deposition, resuspension, and root uptake of Pu in corn and other grain-producing agroecosystems near a nuclear fuel facility

ULTRAVIOLET RADIATION
193 Ultraviolet radiation and blue light from photofloods in television studios and theaters

UNITED NATIONS SCIENTIFIC COMMITTEE ON THE EFFECTS OF ATOMIC RADIATION
357 Annual frequency of diagnostic x-ray examinations in the Netherlands

URANIUM
333 Daily U intake in Utah residents from food and drinking water

WASTE, LOW-LEVEL
461 Biodegradable liquid scintillation counting cocktails

WASTE, LOW-LEVEL (CONT.)
849 Effectiveness of three natural biobarriers in reducing root intrusion by four semi-arid plant species

911 Retention and subsequent release of radioactivity from the incineration of wastes containing microspheres

WASTE DISPOSAL
236 Safety principles and technical criteria for the underground disposal of high level radioactive wastes

471 Default soil solid/liquid partition coefficients, K_ds, for four major soil types: a compendium

911 Retention and subsequent release of radioactivity from the incineration of wastes containing microspheres

915 Chemical risks from nuclear waste repositories: review of the literature

WASTE MANAGEMENT
849 Effectiveness of three natural biobarriers in reducing root intrusion by four semi-arid plant species

911 Retention and subsequent release of radioactivity from the incineration of wastes containing microspheres

915 Chemical risks from nuclear waste repositories: review of the literature

WATER, GROUND
919 Radon in the human body from drinking water

WEAPONS
179 Atmospheric nuclear weapon test history as characterized by the deposition of ^{14}C in human teeth

X RAYS
295 Radiotherapy verification film for estimating cumulative entrance skin exposure for fluoroscopic examinations

357 Annual frequency of diagnostic x-ray examinations in the Netherlands

939 Annual per caput effective dose equivalent of Beijing inhabitants from diagnostic x-ray procedures

XENON-133
383 Adsorption and desorption of noble gases on activated charcoal: I. ^{133}Xe studies in a monolayer and packed bed

393 Adsorption and desorption of noble gases on activated charcoal: II. ^{222}Rn studies in a monolayer and packed bed
